| Business registry                   |

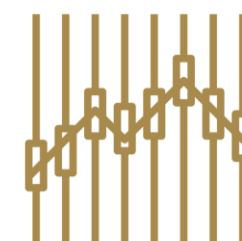

# Proceedings - Indicators

## Key Performance Indicators

- **Clearance rate (CR)** - ratio obtained by dividing the number of resolved cases by the number of incoming cases in a given period.
- **Work Overload (WO)** - ratio obtained by dividing the number of incoming and pending cases 1<sup>st</sup> of January by the number of resolved cases by cases in a given period.
- **Stake Change (SC)** - ratio obtained by dividing the number of pending cases 1<sup>st</sup> of January by the number of pending Cases 31<sup>st</sup> December cases by cases in a given period.
- **Disposition time** - ratio between pending cases and resolved cases (in days). It is the calculated time necessary for a pending case to be resolved, considering the current pace of work of courts.

# Proceedings - Indicators

## Key Figures for Italian Notaries

- Clearance Rate (CR):  
Stable Clearance Rate of 100% for all Notarial cases.
- Work Overload (WO):  
Italian Notaries show no work overload
- Stake Change (SC):  
Very stable low stake for Notarial cases over time.
- Disposition Time (DT):  
DT for Notarial cases is very low (days).

Extremely good case handling process  
+ sufficient capacity building / planning  
+ almost no pending cases  
→ Very fast case resolving
